

Hakawerk has developed a laundry disinfectant to be used as a complement to your regular laundry liquid. Nowadays our textiles often cannot be washed above 30 and 40°C. At these lower temperatures, pathogens are easily transmitted and can subsequently spread throughout the washing load. Can be used effectively in cases of contagious illnesses. Biodegradable. pH 6 – 7.5

APPLICATIONS

Eliminate 99.9% of germs and bacteria from textiles while protecting fabrics and colours

WASH TEMPERATURE

30°C to 40°C

<i>Product</i>	LLPHA06
<i>Size</i>	1L

DIRECTIONS

Machine Wash

- Add 40ml of disinfectant to the fabric softener compartment of your washing machine
- You can combine it with fabric softener
- Dose the detergent as usual

Hand Wash (use gloves)

- Add 20ml in the final rinse water and allow to 'dwell' for 15 minutes
- Read the product information before use

TIPS

Disinfectants are designed to kill all bacteria and should not to be used indiscriminately. Always follow the manufacturer's dilution instructions
