

The 'foamy' bottle allows you to dispense cleaning foam directly onto your cloth, hand or surface! It is designed to work with very diluted detergents or other cleaners.

APPLICATIONS

Excellent for treating fingerprints, small individual marks and general grime.

The bottle is refillable and re-useable. The manufacturer has tested the mechanism and found that they last for up to 12,000 pumps!

Product ILELT170
Size 150ml bottle

DIRECTIONS

Products that work best with the foamy bottle are Neutral Sols, or Ecover washing up liquid.

- The solution needs to be very thin with a consistency similar to water
- As a general guideline, dilute your detergent by approximately 2 - 4 times, i.e. a ratio of 1:4
- The foam works by acting directly on the mark you need to clean
- Trial the bottles and keep a record of your experiments until you find the best dilution and foaminess for your needs

Neutraseife does work with the foamy bottle but the consistency must be correct to prevent the foamer from blocking.

TROUBLESHOOTING

No foam - Is the detergent diluted enough?

If it is too thick it can permanently damage the mechanism. Always good to get the dilution ratio worked out first.

It's not working now - Is the pump clogged?

Tiny particles can cause havoc. Empty the container, clean the pump screen and flush with water.

It won't pump foam

Avoid allowing water into the air compartment. Do not clean the pump under running water or by submerging it in water. If it begins to stick, simply turn upside down (like an aerosol paint can) and pump it a couple of times.
