

LITHOFIN MN STAIN-STOP ECO

This easy to apply treatment penetrates absorbent natural stone surfaces and coats the capillaries with an extremely thin and invisible film of polymers. The treatment prevents the immediate penetration of water-based dirt as well as oil and grease stains.

Water based and nearly odourless. Does not change the stone's appearance. Solvent free. pH 7 - 9

APPLICATIONS

All natural stone, marble and granite. Great protection for wet areas.

EQUIPMENT

- Soft bristle brush, roller or lint-free cloths
- Gloves to protect your hands

Product	ISTLI030
Size	1 L

INSTRUCTIONS

Before Applying Impregnator

- Check suitability with a test in an inconspicuous area. Follow the instructions on the label
- If underfloor heating exists, switch it off and allow the surface to cool to room temperature
- Clean the surface thoroughly before treatment. Rinse to remove any residue of cleaning chemicals
- Wait at least 24 hours before applying the impregnator. The stone must be completely dry before sealing

Step 1

- Shake bottle well before use
- Apply solution generously and evenly to the dry surface using a brush, roller or lint-free cloth
- Work on small areas at a time

Step 2

- Remove any residues completely within 15 minutes with a soft dry cloth, do not allow residues to dry on the surface

Step 3

- On highly absorbent stones, repeat application after 1 hour following the above instructions

TIPS

- Recommended for yearly maintenance of high-traffic areas
- Allow to dry completely for 24hours+ before applying any other chemical
- On large surfaces, remove the residues with a squeegee
- Marble and limestone will remain sensitive to acids
