

The award-winning Absorber feels like a chamois leather to the touch but is made from a unique material called PVA, kind to surfaces and to your skin. Does not scratch, safe for use on all surfaces.

The Absorber holds 50% more water and dries 20 times faster than a chamois leather, leaving a streak-free finish. Resistant to most chemicals. Unharmful by grease and oil. Lasts for years with normal use.

#### APPLICATIONS

Use it anywhere you'd use a towel, chamois or sponge. Great on showers, baths and basins; helps to prevent limescale build-up and mildew formation.

<i>Product</i>	ICDCT01N/B/P
<i>Size</i>	33 x 43 cm

#### CARE OF YOUR CLOTH

- Before first use, rinse the Absorber with warm water or place in a washing machine with other items of similar colours. We recommend using liquid detergent and warm water. Do not use fabric softener or bleach. Do not dry in the tumble dryer
- After use, rinse the Absorber well, wring out and place back in its tube, damp. The Absorber's anti-mould and mildew technology will prevent rotting and extend the life of the product
- If you allow your Absorber to air dry, it will become stiff, don't worry - just rehydrate it in warm water and it will spring back to life and be ready to use
- Routine washing is highly recommended. If you repeatedly place a soiled Absorber in its tube, it will still work, but may acquire an odour or grow mildew

#### TIPS

- Personal technique may vary, but for larger surfaces (marble floor, hull of a boat) try laying the Absorber flat and dragging it across the surface
- You will find your own methods that work best and be amazed at how much time you save using the Absorber!
- Available in Natural, Blue, or Pink.
