

Traditional, highly effective stain removal tool. Manipulate spotting chemicals into stained fabrics without worry of chemical reaction to scraper. Bone is neutral to practically every spotting chemical.

#### APPLICATIONS

Ideal for precise stain removal, working in stain-removal agents, gum removal and lots more.

#### EQUIPMENT

Gloves to protect your hands

*Product* LS RCS010

#### INSTRUCTIONS

Spatula can be used to lift off excess semi-solid stain material and to loosen caked-on stains. Remove as much of the stain as possible to make it easier for the stain-removing agent to reach the surface

##### *Step 1*

- Don't press hard, move the edge of your scraping tool back and forth across the stain in short strokes to lift the excess material. Be gentle to avoid damaging the stained surface

##### *Step 2*

- To remove some stains, you must add water or a stain-removal agent as you scrape, working the liquid into the stain

##### *Step 3*

- Rinse treated area thoroughly from the reverse side of the fabric and launder as per care label instructions

#### TIPS

- When applying a stain-removal agent, always start from the outside of a spot and work your way in towards the centre
- Never rub or scrub! Rubbing and scrubbing will make spot removal more difficult
